

What is CHERUBS?

No one knows what life is like with a child born with CDH like the other parents who have walked this path. It is a very emotional, stressful, and physically demanding time. Just knowing you are not alone can make all the difference in the world. CHERUBS was founded so that no family has to go down this path alone.

Our Organization

CHERUBS is an international organization for families and care-givers of children and adults who are diagnosed with Congenital Diaphragmatic Hernia (CDH). As of November, 2008, we have over 2600 members in all 50 states and 38 countries. Our Board Members include the founding father of in-utero surgery, genetic counselors, epidemiologists, nurse practitioners, parents of CDH survivors and non-survivors, and some of the best pediatric surgeons in the world. We are a volunteer-run organization and a United States Internal Revenue Service recognized 501(c)(3) Non-Profit Organization.

FUNDRAISING
for

CHERUBS

*The Association of Congenital Diaphragmatic Hernia
Research Awareness, and Support*

Baseball Tournament

Over 1600 babies are born each year in the United States with C.D.H. 50% of these babies do not survive. 50% win the CDH war but many still fight battles. Help us to fight this war against Congenital Diaphragmatic Hernia.

CHERUBS is here for these families, offering information and support, bringing awareness to Congenital Diaphragmatic Hernia and promoting research to help find the cause and prevention of this devastating birth defect.

"The measure of life is not its duration, but its donation" - Peter Marshall

Congenital Diaphragmatic Hernia

What is CDH?

Congenital Diaphragmatic Hernia (CDH) occurs in approximately 1 in every 2,500 births (1,600 cases in the U.S. each year). The cause of CDH is not yet known. The diaphragm is formed in the first trimester of pregnancy and controls the lungs' ability to inhale and exhale. CDH occurs when the diaphragm fails to form or to close totally and an opening allows abdominal organs into the chest cavity. This inhibits lung growth.

Every patient diagnosed with CDH is different. Survival rates depend on the types and number of organs involved in the herniation and the amount of lung tissue available. There are many surgical procedures and complications that may or may not occur with each individual, including in utero surgery.

Roughly 50% of babies born with CDH do not survive. Of the 50% that do survive, most will endure long hospital stays, feeding issues, asthma and other problems. A few of the survivors suffer from severe long-term medical issues.

CDH occurs as frequently as Spina Bifida and Cystic Fibrosis, yet there is very little research being done and virtually no media coverage.

requires a permit.

How Do I Advertise: Flyers/posters around town, include churches and clubs, grocery store/restaurant bulletin boards, place of employment. Get kids involved with spreading the word. Local high school student council, boy scouts/girl scouts. Free community TV channel (if you have a local one) is also a good place!

What I Do I After The Event: Send CHERUBS a record of purchases, donations and the final amount raised. Please leave location of event as you found it.

What Else Do I need To Do: Take photos for CHERUBS newsletter and web site. Highly publicize that players play and attendees watch the game at their risk.

As with all fundraisers and events, ALWAYS make sure to follow all local, state and federal laws and always be safe
